## PROFESSIONAL SUMMARY

Full Stack Software Development Engineer with over 2.5+ years of professional experience in MERN stack development, designing and building responsive, scalable web and mobile applications. Proficient in JavaScript, React JS, Redux, React Native, Node.js, Express JS, and MySQL, with strong expertise in RESTful API development and integration, frontend architecture, database schema design and indexing, authentication and authorization, role-based access control (RBAC), unit testing with Jest, and performance optimization. Experienced in end-to-end feature delivery, release support, production fixes, and cross-functional collaboration with backend developers and designers in Agile environments.

## CORE COMPETENCIES

MERN Stack Development | Full Stack Development | Web & Mobile Application Development | RESTful API Development & Integration | State Management (Redux) | Unit Testing (Jest) | Database Design, Schema Design & Indexing (MySQL) | Authentication & Authorization | Role-Based Access Control (RBAC) | Performance Optimization | Reusable Component Design | Version Control (Git/GitHub) | Release Support & Production Fixes | Cross-Functional Collaboration

## TECHNICAL SKILLS

**Programming Languages:** JavaScript (ES6+), Java
**Frontend:** React JS, Redux, React Native, HTML5, CSS3, Tailwind CSS
**Backend:** Node.js, Express JS, RESTful APIs
**Database:** MySQL (Schema Design, Indexing, Data Modeling)
**Testing:** Jest (Unit Testing)
**Core Concepts:**Object-Oriented Programming (OOP), Responsive Web Design, State Management, Authentication & RBAC
**Tools & Technologies:** Git, GitHub, CLI Tools, MySQL Workbench, Postman, VS Code, npm

## WORK EXPERIENCE

**SABADO Technologies, Bangalore** *June 2024 - Present*
*Software Development Engineer*

- Designed and developed responsive, scalable UI components using React JS, Redux, React Native, and Tailwind CSS, ensuring a consistent cross-platform user experience across web and mobile applications.
- Integrated RESTful APIs and handled authentication, data retrieval, caching, form submissions, and error handling, enabling seamless communication between frontend and backend systems.
- Contributed to the RingPe payment application (live on the Google Play Store) by independently developing a complete Wallet feature, including UI implementation and API integration using React Native.
- Built reusable and modular frontend components to improve code maintainability, scalability, and development efficiency across the codebase.
- Implemented role-based access control (RBAC) on the frontend, dynamically managing routes, UI visibility, and user permissions.
- Developed secure authentication flows, including token management, protected routes, and session-based UI behavior, and improved application performance through lazy loading, optimized routing, and reduced API calls.
- Built and maintained server-side applications and RESTful API endpoints using Node.js and Express JS, and designed MySQL schemas, indexes, and data models, supporting features end-to-end alongside frontend development.
- Wrote unit tests using Jest to validate application logic and API integrations, and used Git/GitHub and CLI tools to support releases and resolve production fixes.
- Collaborated cross-functionally with backend developers and designers in an Agile environment to translate business requirements into functional, user-friendly UI features.

**Technologies:** React JS, Redux, React Native, Node.js, Express JS, MySQL, Jest, Tailwind CSS, JavaScript, RESTful APIs, Git/GitHub, UI Design

**Black Bucks PVT LTD** *June 2023 - August 2023*
*Software Development Intern*

- Developed a web-based restaurant management system enabling restaurants to manage food items, categories, pricing, and availability through an intuitive interface.
- Designed and implemented frontend screens using React JS and integrated RESTful APIs to perform CRUD operations.
- Worked with MySQL to design database tables and schemas, write queries, and manage data related to menus and restaurant operations.
- Ensured smooth backend-frontend data flow by implementing form validation, API response handling, and error management.

**Technologies:** React JS, JavaScript, MySQL, Git/GitHub

## EDUCATION

**SRKR Engineering College, Bhimavaram** *Aug 2020 - Jun 2024*
B.Tech, Computer Science and Engineering

**Tirumala Junior College, Rajahmundry** *Jun 2018 - Jun 2020*
Higher Secondary Education
