# Pechetti Sai Vijay

saipechetti2002@gmail.com | 9347549149 | linkedin.com/in/vijaypechetti | github.com/vijaysai24

## PROFESSIONAL SUMMARY

Full Stack Software Development Engineer with over 2 years of professional experience designing and building responsive, scalable web and mobile applications. Proficient in JavaScript, React JS, React Native, Node.js, and MySQL, with strong expertise in RESTful API integration, frontend architecture, authentication and authorization, role-based access control (RBAC), and performance optimization. Experienced in end-to-end feature delivery and cross-functional collaboration with backend developers and designers in Agile environments to deliver high-quality, user-friendly software products.

## CORE COMPETENCIES

Full Stack Development | Web & Mobile Application Development | RESTful API Integration | UI/UX Implementation | Authentication & Authorization | Role-Based Access Control (RBAC) | Performance Optimization | Reusable Component Design | Cross-Platform Development | Database Design (MySQL) | Version Control (Git/GitHub) | Cross-Functional Collaboration | Debugging & Troubleshooting

## TECHNICAL SKILLS

**Programming Languages:** JavaScript (ES6+), Java

**Frontend:** React JS, React Native, HTML5, CSS3, Tailwind CSS

**Backend:** Node.js, MySQL

**Core Concepts:** RESTful APIs, Object-Oriented Programming (OOP), Responsive Web Design, State Management, Authentication & RBAC

**Tools & Technologies:** Git, GitHub, MySQL Workbench, Postman, VS Code, npm

## WORK EXPERIENCE

**SABADO Technologies, Bangalore** *June 2024 - Present*

*Software Development Engineer*

- Designed and developed responsive, scalable UI components using React JS, React Native, and Tailwind CSS, ensuring a consistent cross-platform user experience across web and mobile applications.
- Integrated RESTful APIs to handle authentication, data retrieval, form submissions, and error handling, enabling seamless communication between frontend and backend systems.
- Contributed to the RingPe payment application (live on the Google Play Store) by independently developing a complete Wallet feature, including UI implementation and API integration using React Native.
- Built reusable and modular frontend components to improve code maintainability, scalability, and development efficiency across the codebase.
- Implemented role-based access control (RBAC) on the frontend, dynamically managing routes, UI visibility, and user permissions.
- Developed secure authentication flows, including token management, protected routes, and session-based UI behavior, and improved application performance through lazy loading, optimized routing, and reduced API calls.
- Built and maintained backend API endpoints and database operations using Node.js and MySQL, supporting features end-to-end alongside frontend development.
- Collaborated cross-functionally with backend developers and designers in an Agile environment to translate business requirements into functional, user-friendly UI features.

**Technologies:** React JS, React Native, Node.js, MySQL, Tailwind CSS, JavaScript, RESTful APIs, Git/GitHub, UI Design

**Black Bucks PVT LTD** *June 2023 - August 2023*

*Software Development Intern*

- Developed a web-based restaurant management system enabling restaurants to manage food items, categories, pricing, and availability through an intuitive interface.
- Designed and implemented frontend screens using React JS and integrated RESTful APIs to perform CRUD operations.
- Worked with MySQL to design database tables, write queries, and manage data related to menus and restaurant operations.
- Ensured smooth backend-frontend data flow by implementing form validation, API response handling, and error management.

**Technologies:** React JS, JavaScript, MySQL, Git/GitHub

## EDUCATION

**SRKR Engineering College, Bhimavaram** *Aug 2020 - Jun 2024*

B.Tech, Computer Science and Engineering

**Tirumala Junior College, Rajahmundry** *Jun 2018 - Jun 2020*

Higher Secondary Education
